## TRIKNIT FINISHING

Triknit claims a progressed battling machine which comes in open-width as well as the tubular type that has consolidated limit of 10 tons per day. Alongside solid group which is handy and experienced to work, make the activity, a breeze. Peach finishing machine which gives best finishing touch has a limit of 6 tons per day. The soft-touch machine gives a soft and mesmerizing impact. Progressed Stenter machines control the moisture in fabrics like Lycra, Polyester, Yam-coloured stripes with a limit of 6 tons per day.

## TRIKNIT Garment MAKING

Our shrewd Lectra machine with extraordinary CAD/CAM innovation backing with splendid spreader supports to make expedient patterns and has an efficiency of just about 20,000 pieces every day.

We know that the look and life of the garment are dependent on the quality of stitch as well. Related to our first-rate sans oil apparatus and agile fingered group, we yield about 10,000 pieces for each day.

Triknit believes in the richness of the final presentation. Our modern steam iron sends an eruption of steam through garments to make sure that pieces of clothing are all around pressed, stop free and viably stay away from the spread of infectious disease.

Triknit understands that the brand image is built and sustained on top only if it is assured of the best quality. To achieve this standard we at Triknit are checked in all parameters using the latest technology to guarantee that the fabrics are flawless and we do a Rigorous systematic and difficult investigation in detail.

## Inhouse LAB TESTING

- Triknit lab testing procedures carries out the following tests to keep the fabric quality superior to satisfy the customers.
- **Fabric Shrinkage / Spirality** : The shrinkage of the fabric during the process of laundry.
- **Colour Fastness** : This is to examine that colors of the fabric does not fade, change or bleed during washing, under the sun or anywhere else. Triknit colour fastness test by wet and dry rubbing ensures the fabric remain fresh and vibrant after many uses. This crocking test determine quality of the fabric colour by rubbing of fabric and staining other materials. We reject the fabric that rub off colorants and stain indicating poor colour fastness.
- **GSM or Gram per Square Meter** : The weight, density one square meter of the fabric in grams specifies the thickness of the materials. We provide the right GSM products as per the customers need.
- **Fabric Pilling Test** : A rigorous check is carried out to examine if any bobble, fuzzball, lint ball or any entangled fibers clinging referred to as pill sticking to the surface of the garment.
- Multi fiber Stain Checking
- **Washing** : Our dry (mechanical) and wet (chemical) washing process gives the imparting desired effect on the garments to give a new glassy appearance, extra softness, more comfort and increased strength.
- **Button Pulling Test** : We ensure that the buttons such as ring snaps, plastic, shrank and rivet fixed to the garments are strong and does not break.

## **TRIKNIT** WASHING

Triknit verifies that garments are soft and flexible by our differed washing procedure, such as Stonewash, Enzyme wash, Acid wash, Silicon wash, Bio-clean, Leather finish and so on with capability of 3 tons for every day.

## **TRIKNIT** EMBROIDERY

We at Triknit produce the most simple to complex detailed embroidery that attaches adornment to the fabric by our hi-tech machine that includes Japanese Barudan that can design up to 9 colours and Japanese Tajima Chenelli embroidery machine can create beautiful embroidery stitches such as chain stitch, loop stitch, sequin and so on.
